TECHNICAL SKILLS

Programming: C#, C++, C, Python, Java, SQL

Game Development: Unity 3D, Pygame, VR/XR, HMDs, local multiplayer

Tools & Practices: Git, GitHub, gameplay prototyping, usability testing, UX evaluation, Notion, Figma

Specialties: Accessible serious games, immersive interfaces, optimization algorithms

EXPERIENCE

Undergraduate Researcher / Game Developer
Jun 2024 – Present

SenseGames | e-HealthLab, Fluminense Federal University (UFF) *Niterói, Brazil*

- Develop multisensory VR serious games in Unity and C# for accessible educational and therapeutic experiences, including work designed for autistic people and users with intellectual disabilities.
- Contribute to AstroRoll and GuardaMar, exploring immersive interaction, VR headsets and gaze-based controls.
- Co-organized three days of VR playtesting, gathering usability and presence questionnaires (VRSQ, PANAS, SAM, IPQ, UEQ-S), task metrics and participant interviews to guide improvements.
- Presented projects to public and academic audiences at Rio Ocean Week (2025) and Sisconec.TA (2026), leading a practical workshop on AstroRoll's VR interactions.

Game Development Program Participant / Core Team Member
2025 – Present

DJUFF | Game Development Extension Program, UFF Niterói, Brazil

- Throughout 2025, worked on game development projects, joined game jams, and attended classes and workshops with industry professionals.
- In 2026, joined DJUFF's core team to support program activities and student-led initiatives.

MAIN PROJECTS

guy VS guy | Unity, local multiplayer
2026

- Co-created a downloadable two-player PvP game with traps, sabotage and code-breaking; earned 2nd place among 50 teams at the DJUFF–ACJOGOS-RJ Game Jam. Play on itch.io

AstroRoll | Unity, C#, virtual reality
2025

- Co-developed a wheelchair-based VR game and co-authored the ACM IMX 2025 demo paper "Astroroll - The Rolling Space Hero!: A VR Game Using Wheelchairs." Publication

GuardaMar | Unity, C#, virtual reality
2025

- Built an immersive experience combining marine environmental education and sensory engagement; demonstrated the game to visitors at AquaRIO's Rio Ocean Week 2025.

Tower Defense Placement Optimization | Python, Unity, C#
2026

- Implemented Simulated Annealing and GRASP with local search to optimize tower placement under budget constraints; created an interactive Unity visualization of the results.
